**THE BIG COVER UP!**

Prolonged sun exposure will lead to premature aging of the skin, not to mention wrinkles, discoloration, and even skin cancer. A good sunscreen to protect your skin from the ultraviolet rays is a must! Basal Cell and Squamous Cell Carcinoma are the most common types of skin cancer. These unsightly lesions can even appear up to 20 years after overexposure to sunlight. That is why we urge constant protection from the sun. We offer a wide range of sunscreens that are made of the finest medical-grade ingredients. Don't be seen without sunscreen! Try ours! Other products pale by comparison.

### The Stevens Institute ~ Mastering Men's Skincare!

Men make up a large portion of our practice. Whether you desire facial or body improvement, we have the perfect procedure for you. Ask our Master Medical Aestheticians, Rachael or Ann, how they can help!
